Warranty

We warranty all our reloading tools against defect in workmanship or material under normal use. Our obligation under this warranty is limited to repairing or replacing the tool, provided tool is returned to our factory, freight prepaid, within one year of the date of sale. The warranty will not apply to any tool which has been altered or subjected to misuse or accident. **Returns are subject to a 20% restocking charge, plus the costs of damages and missing parts. We do not refund shipping & handling costs.**

Thank you for your Purchase!

The NEW 800/LS Loader by Ponsness Warren.

Now you CAN have it all, with the NEW 800/LS loader.

The NEW 800/LS Loader has the same attributes of the 800 PLUS with the quick change tooling kits and height of the L/S-1000 to allow for *loading 3" and 3 1/2" shells! This machine also can be adapted to load steel shot. (*with purchase of conversion kit or tooling.)

The 800/LS is available in 12, 16, 20, 28, or 410 gauge

Includes full length sizing dies, and bushings listed.

800/LS12	12 Gauge, Bushings: (H, #6)	\$1100.00
800/LS16	16 Gauge, Bushings: (G1, #5)	\$1125.00
800/LS20	20 Gauge, Bushings: (D, #4)	\$1125.00
800/LS28	28 Gauge, Bushings: (B, #3)	\$1125.00
800/LS410	410 Gauge, Bushings: (2A, #1)	\$1125.00
800/LS413	3" 410 Gauge, Bushings: (3A, #2.5)	\$1150.00

These will come in the L/S style tooling and use the L/S shot bushings, and is already equipped for steel shot. Includes shell holders and bushings listed.

800/LS010	10 Gauge, Bushings: (X, #L15)	\$1350.00
800/LS1235	3 1/2" 12 Gauge, Bushings: (S, #L13)	\$1350.00

Conversion Kits

CONV800LS123	3" 12 Gauge	\$160.00
CONV800LS203	3" 20 Gauge	\$160.00

TOOL800LS1235	3 1/2" 12 Gauge Tooling Set, Bushings Included (S, #L13)	\$425.00

We first started in the reloading industry with the 800B over 40 years ago.

Since that first machine we have produced tens of thousands of shotshell reloaders in different models and configurations. The 800 series reloaders were built with a gear style index system. This system while being very heavy built, also offered a distinctive “click” when the machine indexed. With thousands of these machines still in use today, we have received numerous request for a new machine with all the features of the Platinum 2000, but with the gear style index system that these reloaders use.

The "800 Plus" is equipped with the star gear, index pad, main index gear, etc., giving that “click ” when the machine is indexed. It also has a die removal cylinder, allowing for quick and easy shell removal at virtually any station, the Ez-Fill Access Hopper which holds about a pound of power and 25 lbs. of shot, a brass external adjusting primer feed assembly.

Another great feature of the 800 Plus is the quick changing tooling kits. Since the 800 Plus does not have a center shaft, these tooling kits are installed in a tool head, allowing you to convert to another gauge in under 5 minutes and without the need to re-adjust any of the crimping stages.

The 800 Plus is available in 12, 16, 20, 28, or 410 gauge. 52 lb.

Includes special full-length re-sizing dies. Available in 12, 16, 20, 28, or .410 gauge

The **Auto-Drive** ELECTRIC SYSTEM

This new, easy to install, unit is super quiet when operating. The AUTO-DRIVE features a smooth, heavy duty electric motor which has a built-in brake system, making sure the system will stop instantly, with no creep or unwanted movement. The actuating arm is equipped with a slip clutch system, allowing the arm to slip or stop, under too much pressure.

The AUTO-DRIVE is easily operated by moving the forward/reverse control lever. The full pivoting system allows the arm to work in one continuous motion. If you need to reverse the system, simply reverse the control lever.

The AUTO-DRIVE comes fully assembled and mounted on the steel base. All mounting holes are pre-drilled. Installs on all Ponsness/Warren progressive shotshell reloading machines. 45 lb. 19" depth requirement

Model also available to fit Spolar Gold Premier. Call for pricing.

- AUTODRIVE Electric System - Hand.....\$900.00
- AUTODRIVE Electric System - Foot.....\$950.00

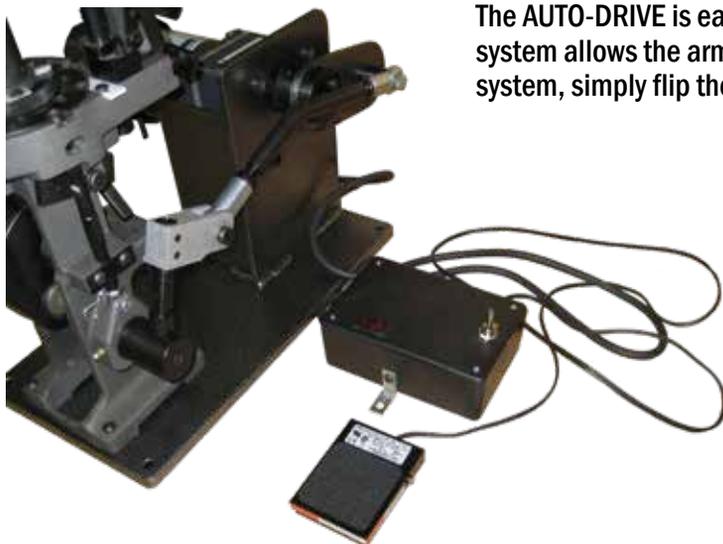

Foot Pedal

The AUTO-DRIVE is easily operated by pressing down on the foot pedal. The full pivoting system allows the arm to work in one continuous motion. If you need to reverse the system, simply flip the toggle switch to reverse and press the foot pedal.

The AUTO-DRIVE comes fully assembled and mounted on the steel base. All mounting holes are pre-drilled. Installs on RL1050, 1000, Super 1050 and XL650.

PLEASE NOTE: The 1050 AUTO-DRIVE system is available with your choice of gearhead speeds:
 - 900 revs per hour (Use this if you are loading rifle ammo)
 - 1,200 revs per hour (Use this if you are loading pistol ammo)

- AUTODRIVE - Electric System.....\$1000.00
 (Please specify hand or foot operation when ordering.)

Proudly the only machine on the market with all this...

- Needle Bearings in the Base
- Bronze bushings in the Crosshead & Wad carrier
- Case activated shot and powder
- Large primer tray
- Primer track tapper
- Shell Counter
- Bore Swab & Brush
- Primer tray wave system (self-induced vibration)
- Large locking spent primer box
- Ergonomical handle
- External adjusting shell seating post
- Double charge locking system (setting the standard in safety)
- Lead or steel Loading

Patriot.....\$1350.00
(Available in 12 gauge only.)

The Automatic Shell Feed System

**Spend less time reloading --
more time shooting!**

(Reloader shown
sold separately.)

Automatic Shell Feed System

Mount this system to your machine and shells will automatically be placed on the shell seating post. The large shell hopper holds 500 empty shells and feeds them brass down onto the shell feed seating assembly. The electric motor which turns the sorting disc in the hopper is equipped with a micro-switch, stopping the motor automatically when the feed tube is full. 30 lb. 12 Gauge only.

SHELLFEED.....Automatic Shell Feed System.....\$425.00

Aluminum Die Access Plate.....\$26.50

Installs quickly and easily on 800 Plus,
Platinum 2000, 950, 900, L/S-1000, and
most 800 series reloaders.

(Auto-Drive shown with Shell
Feed System and Reloader)

Lead, Steel & Bismuth RELOADERS

L/S - 1000

with Die Removal System

The L/S-1000 is the only fully progressive reloader that loads lead, steel, and bismuth shot without the need for any type of conversion kit.

The smooth, quiet index system automatically aligns each shell at every station. With each cycle of the operating handle, the L/S-1000 automatically indexes, de-primers, final crimps and ejects a completed shell. Primers are easily filled in the primer feed tray, then freely slide down the track, into the primer feed assembly. There are no primer tubes to fill, and you can count the remaining primers at any time.

The shell holders and primer knockout/resizing assembly ensures that low or high brass shells are easily resized to factory specifications. This means that re-sized shells will always feed and chamber in any shotgun.

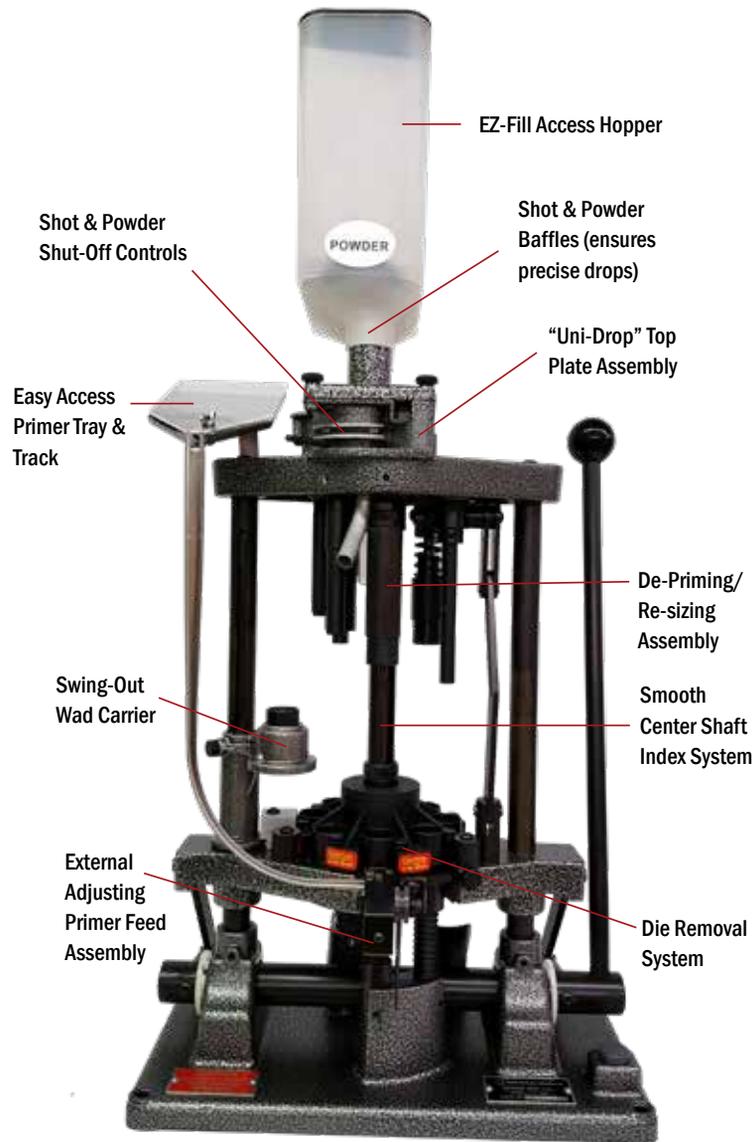

The LS-1000 now comes with our grivory Die Removal System. 53 lb

- LS100010.....10 Ga. L/S-1000, Bushings Included (X, #S15).....\$1150.00
- LS100012.....12 Ga. L/S-1000, Bushings Included (H, #L6).....\$1075.00

All LS-1000 Shot Bushings.....\$9.00

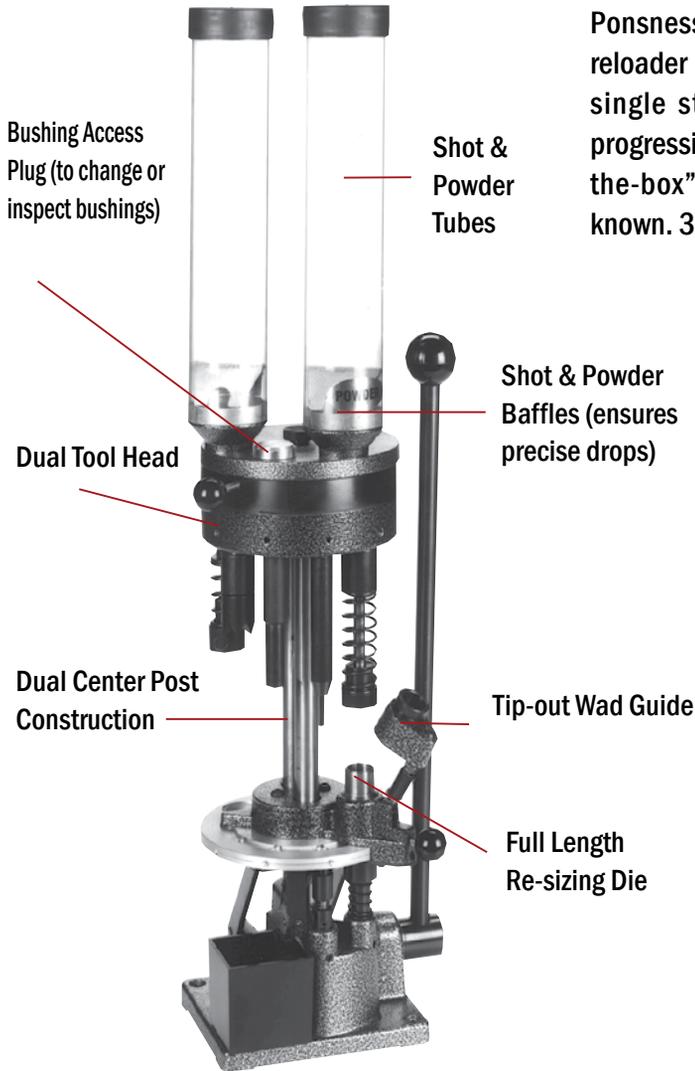

Features

- Includes Die Removal System (see pg.9)
- Loads all types of shot
- Precise "Uni-Drop" system drops any shot size, up to and including BB
- 12 gauge model loads 2 3/4" & 3" shells
- 10 gauge model loads 3 1/2" shells

NOTE: When loading steel shot you cannot use the same shot bushings used for lead shot. When reloading lead shot you cannot use the same shot bushings used for steel shot. Never use a steel shot bushing to throw lead shot charges. This will result in an over-charge of lead shot, which may result in serious injury or death to persons and damage to firearms or property.

Du-O-Matic 375C

Ponsness/Warren understands that many shooters need a shotshell reloader that is both versatile and affordable. This smoothly operating single stage reloader uses the same style of tooling as our big progressive machine, insuring that each shell is given that “new-out-of-the-box” tapered crimp for which Ponsness/Warren reloaders are known. 31 lb

Features

- Loads all types of shot (lead, steel, bismuth) without the need for a conversion kit
- Models available for reloading all shell sizes
- Dual tool head for installation of a 2nd tooling set for quickly changing gauges
- “Tru-Start” and “Tru-Crimp” assemblies apply perfect crimps
- Large shot and powder tubes
- Precision-machined parts
- Bushing Access Plug for inspecting and changing bushings instantly
- Self-centering index system
- Large operating handle
- Durable powder coat finish

Metallic II A Semi-Progressive Single Stage Rifle / Pistol Loader

From the company whose reputation is quality and precision comes another fine loading tool--the rugged Metallic II rifle/pistol press. Ponsness/Warren has designed a totally unique and innovative loader capable of loading 150 rounds or more per hour with utmost precision. The Metallic II has power to spare for re-forming brass, resizing cases, or loading tough calibers. Built with the same high-quality castings as the shotshell line and the Metal-Matic P-200, the Metallic II is precision

machined and coated with a silver vein black powder-coat finish applied electrostatically and baked on for durability. The Metallic II is sold without dies, powder measure or shell holder. The die head has five tapped 7/8-14 holes to accept standard dies, powder measure or other accessories. Conversion from one caliber to another is accomplished in less than five minutes. Once the case is inserted into the shell holder, it is not removed until the case has been resized, new primer seated, powder dropped, and bullet seated and crimped. A depriming tube removes spent primer and residue, keeping the priming area clean. The Metallic II has an automatic primer feed, a design which allows for control of the primers at all times without touching or contaminating them. Optional features which can be purchased include additional die heads (for additional caliber capacity), and a powder measure extension tube to accommodate any standard powder measure.

Metallic II comes complete with small and large primer seating tools and automatic primer feed (less dies, powder measure and shell holder). 32 lb

METALLICII.....Metallic II.....\$575.00

A. Ponsness/Warren BULLET SEATING DIES ~ Have you ever pinched your fingers while seating bullets? Hurts huh? Our bullet seating dies automatically seats the bullet for you. Just mount the die on any press, drop a bullet in the window, and pull the handle. Bullet automatically centers in the sleeve, ensuring perfect reloads, and you also have the option of crimping any bullet. Includes large and small seating pins. Only one die body is required. Bullet sleeves need to be ordered in the calibers you are reloading. 1 lb

METTCALDIE Bullet Seating Die (body only) \$64.95

Metal-Matic P-200

The Metal-Matic P-200 has been designed to hold two calibers at one time. Conversion from one caliber to another is accomplished in less than five minutes. The P-200 uses standard 7/8-14 die sets and powder measure. Castings are heavy die cast aluminum coated with a silver vein black powder-coating finish applied electrostatically and baked on for durability. Under normal conditions a person can load 200 rounds per hour, with some exceeding this average. The P-200 is designed for straight wall cartridges. Metal-Matic P-200 comes complete with small and large primer seating tools (less dies, powder measure and shell holder). 18 lb

P200 Metal-Matic P-200.....\$350.00

B. METAL-MATIC P-200 DIE HEAD -- Extra die head allows for the mounting of additional die sets to quickly change over to a different caliber. 2 lb
PTW0130000.....P-200 Die Head.....\$80.00

C. METALLIC PRIMER FEED -- This primer feed assembly is easily installed, and dramatically speeds up your reloading. Includes large and small primer tubes and equipped with a steel primer tube shield. 1 lb

PONSNESS/WARREN **Reloading Accessories**

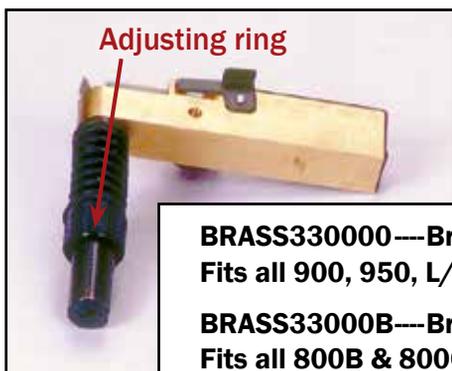

EZ-Seal Top Plate

Designed especially for small gauge reloading & ALL fine powders

The new EZ-Seal top plate has a spring loaded cup and tube with the seal floating over the powder gear, always giving the same tension and pressure. Both o' rings and square rings have a variance of tolerances, with the new EZ-Seal it doesn't matter. The new EZ-Seal now comes standard on all 800 plus and 800/LS machines and since it's factory produced, it is the only top plate sold for Ponsness/Warren equipment that will not void your warranty.

EZSEALTOP.....Top Plate Only.....\$85.95
EZSEALCOMP...Top Plate Complete with EZ-Fill Hopper.....\$95.95

- Bushing pullers have been integrated into the plugs
- Steel bushing access plugs
- New patent pending spring loaded floating powder seal

External Adjusting Primer Feed Assemblies

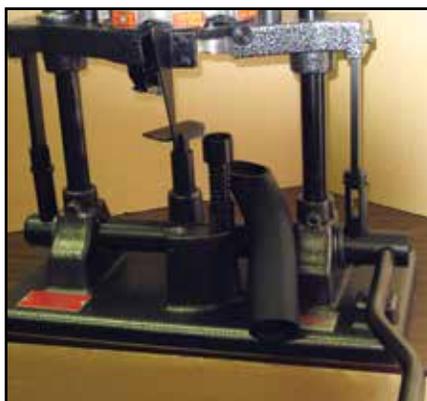

Allows you to change the depth of the primer without taking the primer feed assembly out of the machine. Simply turn the adjusting ring for desired depth. 2 lb

 Fits all 900, 950, L/S-1000, 800 Plus, 800/LS, 800CVT and small gauge 800B & C machines.

BRASS33000B---Brass Ext. Adj. Primer Feed Assembly.....\$160.50
 Fits all 800B & 800C (12 gauge only) machines.

Rear Shell Chute.....\$47.00

Front Shell Chute.....\$47.00

Front Shell Chute w/ Bucket System.....\$79.00

800 Die Removal System Fits 800B, 800C, & 800CVT

New from Ponsness/Warren is a die removal system for all 800 series reloaders. The new "800 Die Removal System" is the same system we use on the new "800 Plus" reloaders. This kit allows for the easy removal of shells from virtually any station on the reloader. Now you can quickly check shot and powder charges, inspect shells, or easily remove damaged shells. All kits are pre-timed at the factory and consists of the following parts: Die Removal Cylinder, Main Index Gear, Star Gear assembly, Center post assembly, etc, with easy to follow instructions. We also include the "Shell Extracting Kit" which allows you to easily knock out a shell from the sizing dies. The 800 Die removal system is available for 800B, 800C, and 800 convertible machines in all gauges.

DIESYSTEM8.....800 Die Removal System.....\$204.95

Die Removal System So strong, it comes with a lifetime warranty!

Update your older reloader with this Die Removal System. This system allows you to easily remove shells during the reloading process for checking shot or powder weights, inspecting shells, etc. Lift a die pin and slide out the shell - it's that easy! The cylinder is made of "grivory," a new compound designed to be stronger and more rigid than aluminum. This new Die Removal Cylinder is built taller, making it much easier to place it in the neutral position. And it's so strong that we are giving it a lifetime warranty against any type of wear.

A. This system is available for 900 "Elite" (serial number must be above 4930), and all 950 "Elite", and L/S-1000 reloaders. Shell Extracting Kit is also included. (The Die Removal System is a standard feature on our new Platinum 2000 series machines.) 3 lb

DIESYSTEM.....Die Removal System w/ Shell Extracting Kit.....\$139.50

B. Shell Extracting Kit

B. Shell Extracting Kit mounts to your bench and allows for the easy removal of a shell from sizing dies or shell holders. Place the shell holder or sizing die into the extracting bracket and tap out shell with the extracting rod. 1 lb

PONSNESS/WARREN **Reloading Accessories**

A. TRU-CRIMP PACKAGE - This crimping package consists of the TRU-START crimp start assembly and the TRU-CRIMP final crimp assembly. Designed to be used with today's plastic or paper shells, your shells will look just like factory. Available in 12 gauge only, this assembly can be used on: 900 "ELITE", 800CVT, 800C and 375C reloaders. NOTE: May be used on 800B and 375B reloaders which have been converted to taper style crimping. 2 lb

TRUCRPACK.....12 Ga. (900, 800CVT, 800C).....	\$69.95
TRUCRPK375.....12 Ga. (375C).....	\$69.95

B. TRU-CRIMP FINAL CRIMP ASSEMBLY - To insure factory looking crimps make sure your reloader is equipped with the TRU-CRIMP assembly. This gives your shells a tighter roll and flatter folds, like factory ammo. Works great with plastic or paper shells. Available in 12 gauge only and will fit 900 "Elite", 800CVT, 800C AND 375C reloaders. NOTE: May be used on 800B and 375B reloaders which have been converted to taper style crimping. 2 lb

TRUCRIMP.....12 Ga. Tru-Crimp Assembly.....(900, 800CVT, 800C).....	\$54.95
TRUCR375.....12 Ga. Tru-Crimp Assembly.....(375C).....	\$54.95

C. ADJUSTABLE TRU-START CRIMP START ASSEMBLY - The unique Tru-Start Crimp Starter is equipped with a built in "lead system" ensuring shells are pre-crimped in their original folds. Quickly installed and adjustable, this assembly will work on all 900, 800CVT, 800C, and 375C machines. Available for 12 or 20 gauge in 8pt., 6pt., or a paper cone head. NOTE: May be used on 800B and 375B

reloaders which have been converted to taper style crimping. Need to measure hole in tool head for adapter size 3/4" or 5/8". 1 lb

PONSNESS/WARREN LUBRICANT.....STOS Slicker than Owl #@&*!

Over twenty years ago, Ponsness/Warren developed a special, moisture resistant, non-petroleum lubricant, called STOS. Quickly everyone realized that STOS was the best all-around grease on the market. We apply STOS on every reloader we build to ensure long-lasting, friction-free performance, use it on all our high grade and every day firearms, along with all the machining equipment at Ponsness/Warren. STOS is also ideal for case re-sizing, fishing reels, automotive parts, gear and cam surfaces, or anywhere that requires lubrication.
